

# Breakpoints Shortcuts in Webflow

## Breakpoint shortcuts

Learn how to use the number keys to rapidly switch between breakpoints in the Webflow Designer.

<https://youtu.be/DV36RpAeNtA>

Keyboard shortcuts can help speed up your web design and proofing process.

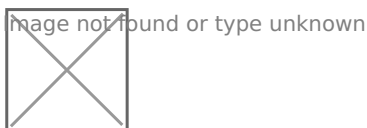

To switch between breakpoints in the Webflow Designer, use the number keys:

- 1 for Desktop view
- 2 for Tablet view
- 3 for Mobile landscape view
- 4 for Mobile portrait view
- If you've added larger breakpoints (1920 pixels, 1440 pixels, or 1280 pixels), the leftmost breakpoint becomes 1, the second-leftmost breakpoint becomes 2, and so on.

There are keyboard shortcuts for almost everything

<https://www.youtube.com/embed/gKMbZLqO-s0>

The Designer has many keyboard shortcuts to help you speed up your design workflow. The quickest way to see the list of all shortcuts in the Designer is pressing **Shift + /**. You can also access this list from the **help menu** on the bottom left of the Designer.

## General keyboard shortcuts

- Show shortcut cheatsheet: **Shift + /**

- Save as Snapshot: **Shift + Command + S** (Mac) or **Shift + Control + S** (Windows)
- Deselect Element/Exit: **Esc**
- Delete Element: **Delete**
- Show Publish Dialog: **Shift + P**
- Show Export Code Dialog: **Shift + E**
- Edit element: **Enter**

## View shortcuts

- Preview mode: **Shift + Command + P** (Mac) or **Shift + Control + P** (Windows)
- Guide overlay: **Shift + Command + G** (Mac) or **Shift + Control + G** (Windows)
- Show element edges: **Shift + Command + E** (Mac) or **Shift + Control + E** (Windows)
- X-ray mode: **Shift + Command + X** (Mac) or **Shift + Control + X** (Windows)

## Left-hand toolbar shortcuts

### Left-hand toolbar shortcuts
